

Website Traffic Analysis Report

Prepared for Alfido Tech — OIBSIP Task 3

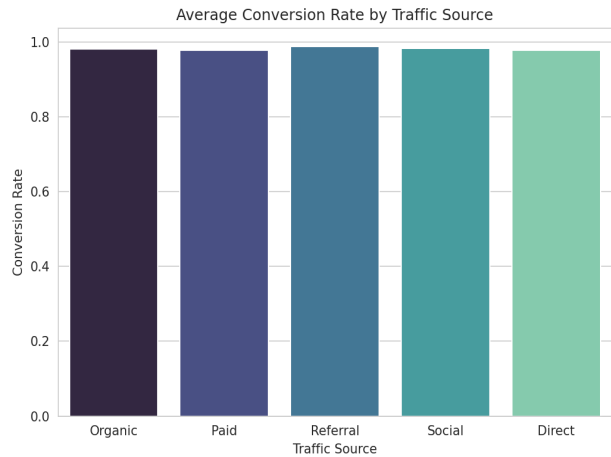

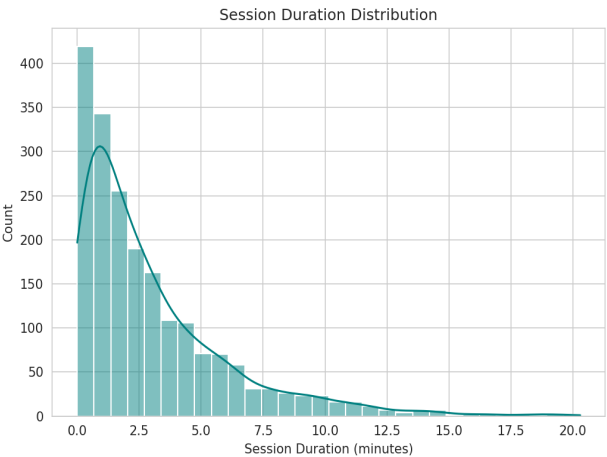

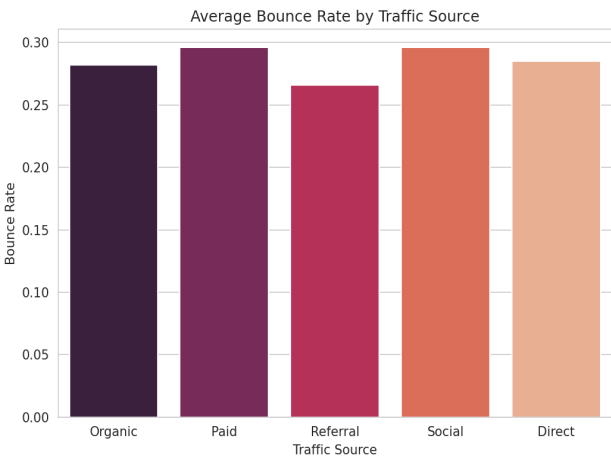

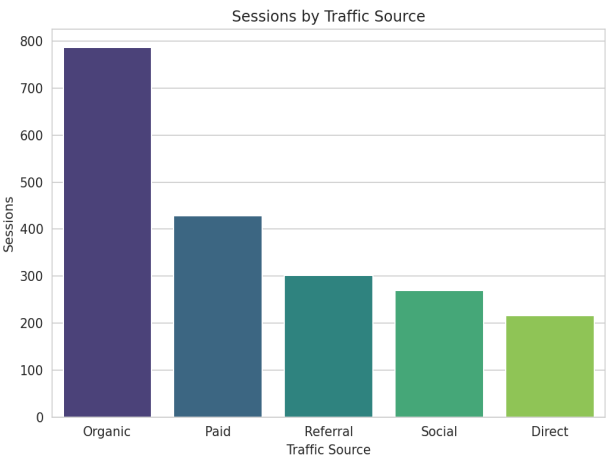

Goal

Analyze website traffic data to understand user engagement, bounce rates, and traffic sources, and recommend optimizations to improve conversions for Alfido Tech.

Metrics by Traffic Source

Source	Sessions	Avg Page Views	Avg Session Duration	Avg Bounce Rate	Avg Conversion Rate
Organic	786	5.025	3.104	0.282	0.982
Paid	428	4.944	2.943	0.296	0.979
Referral	301	4.983	3.125	0.266	0.988
Social	269	4.695	3.057	0.296	0.983
Direct	216	4.963	2.692	0.285	0.979

Visualizations

Key Insights

- Organic search is the dominant traffic channel (786 sessions, ~37% of total).
- Referral traffic has the lowest bounce rate (0.266) and highest conversion rate (0.988).
- Social traffic has the highest bounce rate (0.296) despite good time-on-page.
- Most sessions last under 2.5 minutes, indicating a heavily front-loaded engagement pattern.
- Direct visitors have the most previous visits, suggesting strong repeat/loyal user behavior.

5 Recommendations for Alfido Tech

1. Double down on Organic — invest in SEO/content to protect and grow the largest channel.
2. Fix Social's high bounce rate — align ad/post messaging with landing page content.
3. Learn from Referral's success — identify and strengthen top-performing partner sites.
4. Reduce short-session drop-off — improve above-the-fold content and page load speed.
5. Investigate Paid channel efficiency — review targeting and keywords to reduce bounce rate.
